Glass Care

Handmade fine crystal glass must be handled with the highest of care.

Wash soon after use and by hand with warm water or in a glass washer on your dishwashers glassware setting or between 45-55 degrees.

Ensure the dish or glass washer is limescale and salt free to ensure sustained glassware brilliance. Place glassware carefully into washer rack standing yet stable and not touching to avoid indelible scratches or cracks through vibration impact. We recommend a glass rack for professional use.

As soon as the wash cycle has finished, open to release the steam and allow the fine crystal to air dry. If further polishing is required by hand, use a microfibre cloth and dry carefully. Allow glassware to cool thoroughly and store carefully.
